THE CHALLENGE & THE SOLUTION

Modern Healthcare Needs More Than Software — It Needs Connection and Digital Transformation.

Across clinics and hospitals, most tools still work in silos — one for billing, another for pharmacy, another for records.

This creates delays, duplication, and disconnection that slow down care and raise costs.

NAKBHO connects it all.

It's an all-in-one, intelligent platform unifying your clinical, financial, operational, and patient-facing workflows.

From digital prescriptions and investigation requests to billing and analytics NAKBHO gives you everything your clinic needs to operate smarter, faster, and better.

NAKBHO SOLVES EVERYDAY CHALLENGES

- **Fragmented systems** → Unified digital ecosystem
- **Paper records** → Easy-to-use SMART Electronic Medical Records (EMR)
- **Manual lab forms** → Electronic investigation requests
- **Poor internet** → Offline-first operation
- **Limited follow-up** → Dedicated Patient App

Designed for simplicity. Built for connection.
Ready for digital transformation.

KEY HIGHLIGHTS

Your Clinic or Hospital — Digitally Connected, Efficient, and Patient-Centred

1. Easy-to-Use SMART Electronic Medical Records (EMR)

Centralised, intelligent patient records that doctors can access, update, and share effortlessly — with built-in digital prescriptions and investigation requests.

2. All-in-One Operations Management

Manage appointments, pharmacy, lab, and in-patient care from one clean interface.

3. Smart Billing & Accounting

Automated billing, expense tracking, and instant financial insights for clinics of any size.

4. Intelligent Inventory Control

Track medicines, consumables, and equipment across departments or ranches.

5. AI-Assisted Clinical Support

Detect patterns, guide decisions, and improve patient outcomes.

6. Dedicated Patient App

Patients can book appointments, view prescriptions, access results, and stay connected beyond their visit.

7. Offline-First Cloud System

Work smoothly even without internet; all data syncs when online.

8. Role-Based Access & Audit Trails

Security, accountability, and compliance at every level.

From solo practices to large centres — NAKBHO connects every dot in the healthcare journey.

DOCTOR APPLICATION

Built for Doctors. Designed for Digital Care.

The NAKBHO Doctor App combines simplicity and intelligence, giving doctors full access to clinical data, communication, and decision support – anywhere, anytime.

DOCTORS CAN

- Access complete patient records through the SMART Electronic Medical Records (EMR) system.
- Create digital prescriptions in seconds with automated dose and duration.
- Send electronic investigation requests (lab, imaging, referrals) directly from the consultation.
- View results, attachments, and reports instantly.
- Use smart templates for common conditions.
- Manage appointments and follow-ups linked to the Patient App.
- Communicate securely with staff or patients.
- Print or share prescriptions and reports instantly.
- Work offline - all data syncs when reconnected.

CORE MODULES

One Platform. Every Department. Every Patient Connected

Module	What It Delivers
Outpatient & Inpatient	Appointments, admissions, discharges, and ward management.
Pharmacy	Stock control, expiry alerts, and digital prescription fulfilment.
Laboratory & Radiology	Electronic investigation requests, uploads, and instant patient access.
Billing & Accounting	Automated invoices, insurance, refunds, and financial analytics.
Inventory & Stores	Requisitions, supplier management, and real-time stock tracking.
Admin & Staff	Role setup, shift scheduling, and access control.
Communication Suite	Secure internal chat and doctor-patient messaging.
Analytics Dashboard	Real-time insights into patients, finances, and performance.

Every module is fully integrated with the SMART Electronic Medical Records (EMR) system – connecting clinical care, finance, and operations in one place.

AI & ANALYTICS

From Data to Decisions — The Engine of Digital Transformation.

NAKBHO transforms everyday data entry into real-time intelligence that empowers clinicians and owners to make smarter decisions.

AI FEATURES

- Predict patient load and medicine demand.
- Detect disease patterns and outbreak alerts.
- Measure doctor productivity and clinic performance.
- Forecast revenue and expenses.
- Provide patients with personalised health insights via the Patient App.

DASHBOARD HIGHLIGHTS

- Daily and monthly performance statistics.
- Financial summaries and KPIs.
- Medicine and investigation usage trends.

Connect the dots between data, decision, and delivery — with AI-driven clarity.

SECURITY, SCALABILITY & DEPLOYMENT

Built for Clinics. Engineered for Trust.

Security You Can Rely On

- End-to-end encryption for clinic and patient data.
- Role-based permissions and complete audit trails.
- Aligned with International privacy standards.

Scalable for Every Clinic Size

- Perfect for solo practitioners or growing multi-site clinics.
- Modular setup – activate only what you need.
- Expand seamlessly as your practice grows.

Flexible Deployment

- Cloud: Access anywhere with remote monitoring.
- On-Premise: For clinics requiring local data storage.
- Hybrid: Offline-first operation with auto-sync.

Start small, scale smartly – NAKBHO supports you through your digital transformation journey.

GET CONNECTED

Connecting Every Dot in Digital Healthcare

NAKBHO is a health-tech startup reimagining how clinics and hospitals deliver care through SMART Electronic Medical Records (EMR) and connected digital systems.

We partner with forward-thinking healthcare leaders ready to embrace digital transformation and build the clinics of the future.

OUR MISSION

To make digital healthcare simple, scalable, and accessible – empowering every clinic to connect patients, data, and teams effortlessly.

WHY CHOOSE NAKBHO

- One unified platform for all departments.
- Affordable and intuitive for small clinics.
- Integrated SMART Electronic Medical Records (EMR), Digital Prescriptions, and Investigation Requests.
- Dedicated Patient App for ongoing engagement.
- Offline-first technology for uninterrupted care.
- AI-powered insights for data-driven decisions.
